

TuffTote™ Combo Totes

Integrated sleeve plus pallet: sleeve and pallet in one unit.

TuffTote™ Combo Totes combine a corrugate sleeve and a corrugate pallet in one integrated unit: the pallet's top deck and the bottom collar of the sleeve are one piece. Like every product in our line, they are made by qualified licensees using the patented MaxCorr™ process.

Benefits

- ✓ **One piece.** Sleeve and pallet in one unit, stronger than two separate pieces, with high structural strength (35,000 lbs.).
- ✓ **Quick to assemble.** Quick assembly and lower assembly cost. Easier to load and handle.
- ✓ **Collapsible.** Collapses to about 6 inches for storage and return, and stacks high.
- ✓ **Light for shipping.** Lighter than wood crates, which lowers freight cost. Well suited to air shipment.
- ✓ **Clean and export ready.** No nails, splinters or splinters. 100% recyclable and repulpable. Exempt from ISPM-15 heat treatment.*

Exempt from ISPM-15 heat treatment*

How it's made

Because the base is built with the MaxCorr™ process, TuffTote™ Combo Totes share the core traits of the product line. The pallet base is made with a patented process, so the sleeve and the pallet work as one unit. Qualified licensees produce them in their own plants, custom built to the customer's performance requirements.

Want TuffTote™ Combo Totes for your operation, or want to make them under license?

We'll connect you with a licensed producer. See the full product line at <https://tggtec.com/products/>.
